ACHIEVEMENTS

Worked with 2K+ international clients on Fiverr

Completed complex projects across multiple industries

TECHNICAL SKILLS

Environment art	Level design	3D modeling
Texturing (PBR)	Lighting & rendering	Modular asset creation
Game asset pipeline	Realtime optimization	Cinematics & camera
AI-Assisted Workflows (Mesh, texture generation, Workflow Integration)		

PROFESSIONAL EXPERIENCE

3D Generalist / Environment & Level Artist - CODELIKEME
2024 - 2026

- Authored game-ready assets and modular environment sets for realtime engines
- Designed and assembled gameplay-focused levels and environments in Unreal Engine
- Modeled, textured, and lit performant assets following game art best practices
- Created materials and Blueprint-driven asset functionality for in engine use
- Developed environment and prop VFX to support gameplay feedback and immersion
- Optimized scenes, assets, and lighting for realtime performance targets

Freelance 3D Generalist / Architectural Visualization Artist
Xolotl Studio - 2019 - Present

- Created 3D assets and environments across realtime and photorealistic pipelines
- Modeled and textured architectural and product assets with production ready topology
- Developed large scale architectural visualization scenes for residential and commercial projects
- Designed spatial layouts and architectural concepts from brief to final visualization
- Produced physically based lighting and rendering for high fidelity imagery
- Built realtime environments and assets for interactive visualization and presentations
- Produced product renders and animations for e-commerce and marketing platforms
- Modeled packaging and commercial design assets for brand visualization
- Collaborated with clients to translate design intent into finalized 3D visuals
- Delivered complete projects from concept through final rendered output

Motion Graphics & Video Editor
Enfection (Pvt) Ltd - 2023-2024

- Designed motion graphics content for social media and digital marketing campaigns
- Produced promotional videos integrating motion graphics, VFX, and branded visuals
- Created product animations for advertising and commercial presentations
- Developed visual assets and layouts for marketing and campaign materials
- Produced high-quality presentation and corporate videos with advanced motion design
- Edited and composited video content for online and promotional distribution
- Collaborated with marketing and creative teams to deliver engaging visual content

Packaging & Product Designer / Graphic Designer
Godrej Household Products Lanka (Pvt) Ltd
2023-2024

- Designed product packaging graphics for bottles, boxes, labels, and retail materials
- Created 2D and 3D packaging concepts and product visualization assets
- Developed product stickers, branding elements, and commercial artwork
- Produced digital and print marketing visuals for campaigns and promotions
- Prepared advertising and campaign materials across multiple product lines
- Delivered high-volume design work in a fast-paced FMCG production environment
- Maintained accuracy and brand consistency under tight deadlines

PROJECTS & PORTFOLIO

3D Modelling/ Level & Environment Designing/ Unreal Engine

Stylized Village Environment - Unreal Engine - [bit.ly/Holwuhrum]

- Created modular stylized environment kit
- Designed composition and level layout
- Modeled and textured assets using trim sheets
- Implemented lighting and atmosphere in UE
- Optimized for realtime performance

Dynamic Planetary System - Unreal Engine

- Developed a dynamic planetary system featuring day-night cycles, orbital motion, and gravity based gameplay mechanics
- Implemented procedural generation techniques for selected planets while creating custom assets for others
- Designed planet texturing workflows and vegetation placement without using Unreal's landscape or foliage tools, adapting them for spherical surfaces
- Created optimized LOD systems to ensure smooth realtime rendering of large planetary environments
- Applied advanced material and texturing techniques to maintain high visual quality while reducing performance cost
- Designed aesthetically cohesive planetary environments and assets to enhance visual immersion
